Type: ROUTINE INSPECTION
Date: 16-NOV-2022

3.15

Primary enclosures used to transport live dogs and cats.

The registrant admitted that on August 26, 2022 that he transported a dog with a primary enclosure which was visible in a photograph posted by the registrant on-line. There were multiple concerns with the primary enclosure to include; it did not have handles or handholds on its exterior nor projecting rims. Primary enclosures need to have handles or handholds in order to avoid physical contact with the animal and projecting rims to ensure proper ventilation during the transport process. Contact with the animal and improper ventilation could result in harm, injury or undue stress to the animal. In the future, the registrant must comply with all regulations relating to transport and primary enclosures.

This inspection and exit interview were conducted with the registrant.
