KATHLEEN FUTRELL

Type: ROUTINE INSPECTION
Date: 26-JUN-2019

3.131(a)

SANITATION.

The interior housing area of the singly housed coatimundi is excessively dirty. The resting boards have a black film on most of their surfaces. Fecal and food waste is caught between a front board and the resting boards. An accumulation of fur is on a board behind the inside cage. The interior of this enclosure needs to be cleaned more thoroughly on a routine basis. This was corrected during this inspection.

This inspection and exit interview were conducted with the owner.
