AMBASSADORS, INC.

Type: RE-LICENSE INSPECTION
Date: 21-JUL-2025

2.75(b)(1)

Records: Dealers and exhibitors.

During the inspection process, APHIS inspectors observed a facility employee stop a facility tour vehicle to place feed inside an enclosure housing 2 zebu, 2 goats, 6 pigs, 3 emus, 4 ducks, and 5 geese to allow facility patrons to more closely visualize the animals. The animals within the enclosure were not included in the facility's acquisition records. Records of acquisition to include information about the animals and the source of the animals are necessary to allow for legal and medical tracking of the animals. The facility shall make and keep records which fully and correctly disclose all the required acquisition information for all animals purchased or otherwise acquired and in their possession/under their control including any offspring born.
Correct by: 07/23/2025

3.153(a)(1)(ix)

Primary enclosures.

The Barn Owl and the Harris's Hawk enclosure had walls with exposed damaged plywood that was not able to be effectively cleaned and sanitized. Primary enclosures must be constructed and maintained so that all surfaces in contact with the birds may be readily cleaned and/or sanitized in accordance with 3.158 or be replaced when worn or soiled.
Correct by: 07/23/2025

3.158(b)(1)

Cleaning, sanitization, housekeeping, and pest control.

The interior walls of the primary enclosures housing an adult Harris's hawk and Barn owl have several large areas, approximately 2x3 feet, coated with an accumulation of bird excrement. Accumulations of excreta and other material can harbor microorganisms that could cause animal illness. The applicant must ensure that primary enclosures for birds are sanitized as often as necessary to prevent such accumulations and other disease hazards
Correct by: 07/24/2025

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.
