Type: ROUTINE INSPECTION
Date: 12-JAN-2022

2.80(a)

Records, disposition.

In the fall of 2021, registrant was involved in a car wreck at night with the transport vehicle. The animals were switched over to a different vehicle, but all of the paperwork was left in the vehicle. When the registrant went back later to finish cleaning out the wrecked vehicle, they arrived to discover that it had been emptied and all paperwork had been removed/discarded without their knowledge.

No dealer, exhibitor, broker, operator of an auction sale, carrier, or intermediate handler shall, for a period of 1 year, destroy or dispose of, without the consent in writing of the Administrator, any books, records, documents, or other papers required to be kept and maintained under this part.

Correct by maintaining originals and/or copies of the required records for at least 1 year.

Records have been maintained for transports that have occurred since the vehicle wreck.

3.18(d)

Critical

Care in transit.

Inspection Report

Around June 2021, an adult male dog named 'Kobe' was picked up in Chicago. While switching the dog over, he attempted to bite and attack the registrant, got loose and ran into the neighborhood. The owners of the dog flew to the area and along with the registrant, 'Kobe' was eventually recovered.

In early July 2021, 'Oso', an adult male Great Pyrenees mix dog, approx. 5.5 years old, was being transported from Missouri to Washington. In El Paso, TX, 'Oso' got loose during a potty/walk break at a gas station around 4:30 AM. The registrant looked for and tried to recover the dog for approx. 12 hours before leaving the area. The local animal control was also notified of the loose dog. The owner nor the registrant have been able to recover the dog.

Removal during transportation in commerce prohibited. Except during the cleaning of primary enclosures, as required in 3.15(b), during transportation in commerce a dog or cat must not be removed from its primary enclosure, unless it is placed in another primary enclosure or facility that meets the requirements of 3.6 or 3.15.

Correct by not removing animals from their primary enclosure during transport.

This inspection was conducted with facility representative and the exit interview was conducted with registrant.
