

Inspection Report

Tiger Truck Stop Inc.
P.O. Box 424
Grosse Tete, LA 70740

Customer ID: **5603**
Certificate: **72-C-0196**
Site: 001
TIGER TRUCK STOP, INC.

Type: ROUTINE INSPECTION
Date: 29-MAY-2014

2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Inspector reviewed the written Program of Veterinary Care (PVC). The PVC stated that ectoparasites will be addressed As needed . No notation was made regarding the type of medication, dosage, administration frequency, and route used to administer medications. The PVC also states under the emergency care section that due to distance we cannot guarantee availability . A written PVC, which accurately reflects the arrangement of veterinary care at the facility, is required in order to ensure that all animals receive appropriate veterinary care. The licensee must ensure that they are able to provide inspectors with current, written PVC, which has been developed in conjunction with the attending veterinarian. The licensee must also ensure that if the primary attending veterinarian is unavailable due to distance, that a secondary veterinarian is available should an emergency situation arise.

To be corrected by 29 June 2014

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Inspector observed two medications that were expired. A bottle of Uniprim antibiotic powder (TMPS), with an expiration date of May 2012, and a tube of Equimax dewormer (ivermectin/praziquatnel), with an expiration date of September 2013, were stored in a refrigerator that is used to thaw meat for daily feeding. Expired medications may not work as expected, may be contaminated, and could harm the animal if used. The facility must ensure that all medications are not expired in order to protect the health of the animals.

The facility representative discarded the expired medications at the time of the inspection.

Routine inspection and exit conference were conducted with facility representatives.
