Triple B Farms LLC
823 Berry Lane
Monongahela, PA 15063

Customer ID: **6020676**
Certificate: **23-C-0408**
Site: 001
Triple B Farms LLC

Type: ROUTINE INSPECTION
Date: 08-APR-2025

3.56(a)(1)

Sanitation.

The rabbit enclosure has a large accumulation of feces. The center of the wire enclosure has a pile of rabbit feces which is approximately 2-3 inches deep, and there is an accumulation of bird feces on the walls and along the inside perimeter of the pen.

Failure to remove accumulations of excreta from primary enclosures can allow for the spread of disease hazards, create unpleasant odors, and attract pests.

Primary enclosures for rabbits shall be kept reasonably free of excreta, hair, cobwebs, and other debris by periodic cleaning.

Correct by April 22, 2025.

3.56(d)

Sanitation.

There was an accumulation of bird feces within the rabbit enclosure. The feces was observed on the walls, shelters, and on the perimeter of the floors within the enclosure.

Failure to maintain an effective pest control program can allow for the introduction and spread of disease hazards to the animals.

The licensee must ensure that a safe and effective pest control program is established and maintained at the facility in order to control insects, ectoparasites, and avian and mammalian pests.

Correct by: April 22, 2025.

This inspection and exit interview were conducted with a facility representative.
