3.6(a)(2)(x)

PRIMARY ENCLOSURES.

Fifteen puppies in three enclosures had feet passing through the floors of the enclosures.

Flooring that allows feet to pass through it could cause the puppies to be injured or get stuck preventing nursing. The enclosures must have floors constructed in a manner that protects the dogs' feet and legs from injury, and that, if mesh or slatted construction, do not allow the dogs' feet to pass through any openings in the floor.

To be corrected by: July 31, 2018

This inspection and exit interview were conducted with a facility representative.
