Type: ROUTINE INSPECTION
Date: 12-JUN-2017

3.4(b)(3)

OUTDOOR HOUSING FACILITIES.

The shelter structure for one Akita has a flat front with a hole cut into it for access. This does not provide adequate wind and rain protection to the interior of this shelter for this dog. All outdoor dog shelters must be provided with a wind break and rain break at the entrance. Correct by 17 June 2017.

3.4(b)

OUTDOOR HOUSING FACILITIES.

One Akita is not provided with adequate areas of shade. During part of the day this enclosure is shaded by near-by buildings, but during the middle of the day this dog will not have enough shade. Inadequate areas of shade may lead to overheating of the dog. All outside enclosures must be provided with areas of shade that will protect the dogs from the direct rays of the sun. Correct by 17 June 2017.

This inspection and exit interview were conducted with a facility representative.
