P O Box 331
Franksville, WI 53126

Customer ID: 2331
Certificate: 35-C-0014
Site: 001
JO DON FARMS, INC.

Type: ROUTINE INSPECTION
Date: 17-NOV-2015

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

**Two female sheep have overgrown hooves on all four feet and the back hooves were beginning to curl upward in an elf shoe appearance. An intact adult male llama had overgrown hooves and the tips of both fore feet were beginning to curl inward. Overgrown hooves can be painful and can lead to other health issues such as problems walking normally if not treated. Correct by providing appropriate hoof care to the sheep and llama.

**A white gelded male llama has approximately a 2x2 area of hair loss on both cheeks. Hair loss is an abnormal condition that can be indicative of other underlying health problems such as skin infections. The attending veterinarian should be consulted to evaluate the hair loss.

Correct by: November 24, 2015

3.53(a)(1)

PRIMARY ENCLOSURES.

**Three rabbit enclosures have areas of excessive rust on the interior surfaces. Excessive rust does not allow for the structural integrity of the enclosures. The excessive rust must be removed in a manner that will allow for the structural integrity of the enclosures.

Correct by: December 17, 2015

3.56(a)(1)

SANITATION.

**Two rabbit enclosures have soiled bedding and an excessive accumulation of fur. Excessive accumulation of fur and soiled bedding can increase risk of disease. The enclosures should be cleaned and maintained in a manner to prevent an accumulation of fur and soiled bedding in order to protect the rabbits from contamination and disease.

Inspection Report

3.81(a)(1)

ENVIRONMENT ENHANCEMENT TO PROMOTE PSYCHOLOGICAL WELL-BEING.

**There was a singly housed lemur at the facility. There have been failed attempts to pair house the animal with other non-human primates at the facility. The written environmental enrichment plan had not been updated and approved by the attending veterinarian to address the need of housing the lemur singly due to aggressive behavior. The written environmental enrichment plan should be updated and reviewed by the attending veterinarian to address the specific needs of this animal.

Correct by: December 4, 2015

Inspection and exit briefing conducted with the facility representative and ACI Miller and VMO Barksdale.
