Shipshewana, IN 46565

Customer ID: **323233**  
Certificate: **32-C-0224**  
Site: 001  
VERNON D MILLER

Type: ROUTINE INSPECTION  
Date: 07-OCT-2015

### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The male red kangaroo has a thickened right forelimb. The area of the limb just above the paw and extending about halfway up the limb is thicker than the left forelimb. Licensee stated the right limb has always been bigger than the left, and maybe now it is larger still. The kangaroo walks and uses the limb without any apparent restrictions. The thickened limb may indicate underlying injury or disease. Licensee must use appropriate methods to prevent, control, diagnose, and treat diseases and injuries. The male red kangaroo must be examined by a licensed veterinarian for diagnosis and treatment. Documentation of the veterinarian's assessment, treatment, and plan shall be maintained by Licensee for examination by APHIS officials.

Correct by: October 14, 2015

### 2.75(b)(1)

#### RECORDS: DEALERS AND EXHIBITORS.

There are many animals of various species present at the facility. Animals are routinely bought, sold, and are born on the premises. Occasionally, animals die while at the facility. Licensee does not currently maintain records of these events. Without records it is impossible to verify productivity and health management, or trace animals in the event of a disease outbreak. Licensee shall make, keep, and maintain records which fully and correctly disclose the required information, such as all animals which are born, acquired, transported, sold, euthanized, or otherwise disposed.

Correct by: From This Day Forward

## Inspection Report

---

### 3.125(a)

#### **FACILITIES, GENERAL.**

Some of the animal enclosures have fencing which is loose or has holes at the ground level. During inspection, one of the smaller pot-bellied pigs came out of the drive through enclosure by scooting under the fence, walked across the parking lot, and went into the enclosure with the large farm pig. Loose animals are at a higher risk for injury and may cause accidents with the public. Facilities, including animal enclosures, shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.
