Type: ROUTINE INSPECTION  
Date: 05-AUG-2015

### 2.40(a)(1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The written program of veterinary care (PVC) on file is incomplete. The alpaca needs to be added to the written program so that a preventative program is established for this animal. The veterinarian should give specific guidance on routine vaccinations, parasite control as well as an emergency plan for veterinary care for this animal. This is to ensure that the attending veterinarian is aware of all treatments taking place so that the animal is given appropriate care.

Injectable ivermectin is listed for parasite control for the pigs and goats, but does not name the type of ivermectin, dosage, or concentration. The licensee must ensure that he has adequate guidance from the attending veterinarian on all medications and treatments including the name of the drug, dosage, concentration, and route of administration. The program of veterinary care must be complete to provide adequate guidance to the licensee to maintain the health of the animals. The written program of veterinary care on file must be updated to include the alpaca. The type of ivermectin dosage, and concentration must be listed to ensure the animals receive proper care.

Correct by August 21, 2015

### 2.75(b)(1)

#### RECORDS: DEALERS AND EXHIBITORS.

The record associated with the alpaca is incomplete. The record does not list the address, USDA license number or the driver and vehicle license number and State from whom the animal was obtained. Licensee must ensure that complete records are maintained on all animals to document changes in ownership, track animals, and to comply with the animal welfare regulations.

Correct by August 12, 2015

An exit briefing was conducted with the caretaker.
