SIX SHOOTERS INVESTMENT
GROUP LLC

Type: ROUTINE INSPECTION

Date: 29-MAR-2023

3.125(a)

Repeat

Facilities, general.

The metal support system for the barn's roof has several areas in need of repair. There are areas of the metal beams that have severe rust damage and are missing sections of the beam. These defects may impact strength of the supports. The outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

3.137(a)(4)

Repeat

Primary enclosures used to transport live animals.

In the warm room, one adult hedgehog (Tag# 1437) and one adult hedgehog (Tag# 1434) were contained in enclosures lacking adequate ventilation. They were individually contained in plastic containers with ventilation openings on opposite sides of the container. The holes were 0.3 inches each with two of the ventilation holes on each side covered by pieces of clear tape. Animals in transport may suffocate or become heat stressed if carriers are not adequately ventilated or if ventilation openings become obstructed. Corrected by the end of inspection.

This inspection and exit interview were conducted with the facility representative.
