Certificate: **92-C-0192**  
Site: 001  
Blaine Brown

Type: ROUTINE INSPECTION  
Date: 11-JUN-2025

---

### 3.158(a)(1)

#### Repeat

#### **Cleaning, sanitization, housekeeping, and pest control.**

There is an excessive amount of excreta in the pigeon group enclosure. The floor of the enclosure is primarily covered with pine shavings which have not been removed and replaced as often as necessary to prevent amassing waste. There is significant buildup of bird waste material on the floors, perches and enrichment items. Too much excreta and food waste in primary enclosures can soil the birds, increase disease hazards, and attract pests into the enclosure. Remove excreta and food waste from primary enclosures and from under and around primary enclosures as often as necessary to prevent excessive accumulation. Corrected on 12JUN2025.

This inspection and exit interview were conducted with the facility representative.
