Type: ROUTINE INSPECTION
Date: 25-JUN-2018

3.26(d) REPEAT

FACILITIES, INDOOR.

Interior surfaces. There is bare wood on walls, shelves, work bench, window sills and frames, and approximately 20 percent of the floor area near the guinea pig enclosures. Interior surfaces of indoor guinea pig rooms must be constructed and maintained so that surfaces are impervious to moisture so that they can be readily sanitized. Having unsealed surfaces on the walls, shelves, work bench, window sills and frames, and areas of the floor of an indoor guinea pig facility make sanitation difficult and can contribute to excessive odors. Correct by ensuring the walls, shelves, work bench, window sills and frames, and areas of the floor are covered with an impervious surface or sealed to maintain it in a substantially impervious condition.

This inspection and exit interview were conducted with the owner.
