

## Inspection Report

---

Capital Of Texas Zoo L L C  
376 A Jenkins Rd.  
Cedar Creek, TX 78612

Customer ID: **332212**

Certificate: **74-C-1010**

Site: 001

Capital of Texas Zoo L L C

Type: FOCUSED INSPECTION

Date: 28-AUG-2018

---

### 3.131(c)

#### SANITATION.

Weeds and tall grass are growing along the edge of the hippo enclosure and near the enclosure gate .The grass is growing over the electric fence wire by the gate. A snapping sound could be heard near the enclosure.. This sound indicates that there is a short somewhere along the electric fence . Tall grass and weeds covering the electric fence wire can cause a short in the electric fence resulting in a weak or absent current. The electric fence may no longer serve as an effective secondary containment method when the current is weak/absent. Grass and weeds must be kept away from the electric fence in the hippo pen to prevent the animal from gaining access to the fence which could result in injury or escape.

CORRECT BY : 8/29/18

The focused inspection of the hippo and camel exhibits and exit briefing was conducted with a facility employee.
