PREDATORS OF THE HEART

Type: ROUTINE INSPECTION
Date: 13-OCT-2016

3.127(c)

FACILITIES, OUTDOOR.

After a heavy rainstorm, the outdoor enclosure that houses 11 wolves does not have adequate drainage. The enclosure is located at the southwest end of the facility and water from the storm has accumulated in one corner of the pen. Proper drainage is necessary to ensure the animals have a clean, dry and comfortable enclosure at all times, and the accumulated water promotes sanitation and husbandry issues.

As a temporary solution, the licensee is using a pump system to assist with drainage of excess water. In addition, a permanent solution for the drainage issue has been scheduled for October 22, 2016. At that time, a local group will be providing personnel to help place 120 tons of rock to resurface the facility enclosures. The licensee must ensure that all enclosures have a suitable and effective method to prevent the accumulation of water or an effective method to rapidly eliminate the excess water.

Correct by: 11/13/16

This inspection and exit briefing were conducted with the facility representative.
