3.125(a)

Facilities, general.

*** Sections of fencing along the main park barn on the back side both right and left side of the building need to be addressed. The wire is bent with several areas broken and protruding into the main enclosure. These sections of fence need to be maintained in good repair for the safety of the animals.

*** Another section of fence along the main park barn with green tarp is also in disrepair with large sections bent and wires protruding in the runway. These sections of fence also need to be maintained in good repair for the safety of the animals.

*** Two feeders in the park, one in the main barn and the other in the lower barn are in disrepair with metal sides that are protruding outward and rebar that is broken and creating sharp edges where animals come into feed. These feeders need to be maintained in good repair for the safety of the animals.

*** Several of the main support beams around the perimeter of the park have sections of yellow plastic coating coming off the beams and falling into the enclosures. These beams need to be addressed and plastic removed from the enclosures for the safety of the animals.

3.131(a)

Sanitation.

The large barn in the park has an accumulation of feces and old hay pack that is not being cleaned on a frequent enough basis to reduce odors in the area. This barn needs to be cleaned on a more frequent schedule to reduce this accumulation for the health and comfort of the animals.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within (2) more inspection(s) or by Aug 14, 2023 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.
