Site: 001
AgBio Company

Type: ROUTINE INSPECTION
Date: 30-APR-2025

3.53(a)(1)

Primary enclosures.

During the inspection a single juvenile rabbit was observed walking through the food storage area. The rabbit was visibly unharmed and active. Animals kept in suspended caging can injure themselves by falling if escaping their enclosure. They can also get trapped or injured when squeezing through improperly spaced cage bars or injured while roaming outside their enclosures unsupervised. Animals can go hungry and dehydrate if left outside of their enclosures with no other access to food and water. Primary enclosures shall be structurally sound and maintained in good repair to protect the rabbits from injury, to contain them, and to keep predators out.

Correct by: 5/10/2025

This inspection and exit interview were conducted with Facility Representative.
