Type: ROUTINE INSPECTION
Date: 08-AUG-2017

3.11(a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

*** Three enclosures housing two dogs each have an accumulation of fecal waste on 30 to 40 percent of available dirt flooring. The waste buildup is located in the outdoor housing. The licensee stated that it had been a while since the last time the fecal waste had been removed from the enclosures. The potential for soiling or caking of the hair coat exists when the dogs have to walk or rest on the affected surface. Unsanitary living conditions could lead to potential contamination, soiling or caking of the hair coat or disease risks. The licensee must ensure that all excreta is removed from the primary enclosures on a daily basis to reduce any disease hazards, insects, pests, and odors.

To be corrected by: 8/11/17.

This inspection and exit interview were conducted with the facility representative.
