Temperance, MI 48182

Customer ID: **45064**  
Certificate: **34-B-0225**  
Site: 001  
ZACHERY KEELER

Type: ROUTINE INSPECTION  
Date: 01-DEC-2016

### 2.75(b)(1)

#### RECORDS: DEALERS AND EXHIBITORS.

The licensee produced a stack of disposition records but no acquisition records. The records were missing names, addresses and species. There was no animal on hand inventory for review. Every dealer other than operators of auction sales and brokers to whom animals are consigned, shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning animals other than dogs and cats, purchased or otherwise acquired, owned, held, leased, or otherwise in his or her possession or under his or her control, or which is transported, sold, euthanized, or otherwise disposed of by that dealer. The records shall include any offspring born of any animal while in his or her possession or under his or her control. The licensee shall update his record keeping system and provide all of the above transaction's for every routine inspection upon request by the inspector.

Correct from this day forward

### 3.51(d)

#### FACILITIES, INDOOR.

The Bush Baby (primate room) has approximately 7 areas of exposed wood. The interior walls behind the primates and several other areas have exposed wood that is porous. The interior surfaces must be maintained so that they are impervious to moisture and can be readily sanitized. The licensee must repair these areas for proper sanitation. Correct by 12-16-2016

### 3.81(b)

#### ENVIRONMENT ENHANCEMENT TO PROMOTE PSYCHOLOGICAL WELL-BEING.

This facility has 4 primates called bush babies that require enrichment. At this time the licensee is not providing any kind of enrichment items and didn't produce an enrichment plan. The physical environment in the primary enclosures must be enriched by providing means of expressing noninjurious species-typical activities. Species differences should be considered when determining the type or methods of enrichment. The licensee does not know what type of enrichment is needed for this species so a call to the AV was conducted and he will provide guidance.

## Inspection Report

---

The licensee must provide enrichment and a plan for the inspector to review at every inspection.

Correct by 12-16-2016

### 3.125(a)

#### FACILITIES, GENERAL.

The indoor housing enclosures for the hedgehogs in the viewing room and some of the shelves that are used for housing in the back room are rusty. The licensee did move the hedge hogs out of the enclosures in the viewing area and put them in suitable cages. But the breeding room has several rusty shelves that are not maintained in good repair. The licensee must replace all rusty hedgehog shelves that are not being maintained in good repair.

The entrance to an outdoor plastic den box for 2 fox has jagged cracked edges. Outdoor housing facilities shall be structurally sound and shall be maintained in good repair. Jagged edges could cause injury to the animals if they make contact. The licensee must repair or replace this den box for the 2 fox.

Correct both items by 12-16-2016

### 3.131(d)

#### SANITATION.

The hedgehog breeding room has a rodent infestation. While conducting the inspection a mouse was spotted running up the wall and into a tiny hole. There was another notable hole in the opposite corner and mouse droppings were present on top of little plastic den boxes used for the hedgehogs to breed. The licensee had traps laying on a table but when asked were he had some set up he was unable to. The licensee must increase rodent pest control to avoid serious possible veterinary diseases by allowing the mice to get into the hedgehog enclosures.

Correct by 12-4-2016

This inspection and exit interview were conducted with the licensee.
