Canyon Critters L L C
85 Copperdale Ln.
Golden, CO 80403

Customer ID: **41087**

Certificate: **84-C-0104**

Site: 001

CANYON CRITTERS, L L C

Type: ROUTINE INSPECTION

Date: 26-SEP-2016

3.6(a)(2)(i)

PRIMARY ENCLOSURES.

In the outdoor portion of the primary enclosure for the two wolf-dogs named "Lola" and "Lupa", along the side on the outside of the Tropical building the chicken wire had pulled away leaving exposed, sharp edges. Underneath the Tropical Building, boards, chicken wire and other building materials were present, where the animals had access to come into contact with these materials. Along the bottom of the fencing in the primary enclosure are railroad ties with coated wires. The coating of the wires has deteriorated, leaving the sharp edges of the wire exposed. The uncoated wires attached to the primary enclosure fence had sharp, rusted edges protruding outward into the primary enclosure where the animals have access. Multiple nail heads were protruding from the second story outdoor wooden deck in the primary enclosure, which is often used by the wolf dogs. Multiple nail heads were protruding from the wooden border of the outdoor storage shed, where the animals can come in contact with. These sharp edges and points could potentially cause injuries to these animals.

The licensee needs to ensure that the primary enclosure for the dogs must be constructed and maintained so that they have no sharp edges or points that could injure the dogs.

To be corrected by: October 24, 2016.

3.11(c)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

The storage shed in the primary enclosure of wolf-dogs "Lola" and "Lupa" contains building materials, metal stakes, a bicycle, and plastic storage tubs that are accessible by the animals. The accumulations of the materials in the shed have the potential for harboring pests and vermin. Within the primary enclosure, and accessible by the two wolf-dogs, is a gasoline-powered snow blower. Gasoline is flammable and can potentially be toxic to animals.

The licensee needs to ensure that the premises where housing facilities are located, including buildings and surrounding grounds, must be kept clean and in good repair to protect the animals from injury and to reduce or eliminate breeding and living areas for rodents and other pests and vermin.
