### 2.75(b)

#### RECORDS: DEALERS AND EXHIBITORS.

All of the required records were not available for review at the time of inspection.  
The AWA regulations include specific recordkeeping requirements. These records must be made available for review at inspections. The records that were available were not complete.  
Correction date: Have complete records available from this point forward.

### 3.126(b)

#### FACILITIES, INDOOR.

The room holding the birds, primates, and exotic pocket pets smells strongly of ammonia. Ammonia is irritating to the eyes and respiratory system.  
Frequent cleaning (as frequent as necessary), increased ventilation, and ensuring that all of the the interior surfaces of the room stay sealed will help maintain healthy air quality.  
Correct by 10/31/2014.

### 3.127

#### FACILITIES, OUTDOOR.

Due to the extreme weather overnight, a few of the animals (pig, 2 young tigers, red fox) had excess water in their enclosures, and very little dry resting area. With more rain and wind forecast, this must be addressed immediately. Exposure to wet and windy conditions is uncomfortable, stressful, and can predispose them to illness. Plans are underway to remedy the situation by the end of today.  
Correct by: Close of business 10/15/2014.

The inspection and exit briefing were conducted with a facility representative.
