Certificate: **92-C-0057**
Site: 001
Oregon Coast Aquarium

Type: ROUTINE INSPECTION
Date: 29-NOV-2023

3.106(b)(3)

Water quality.

Upon review of the last year of water quality records, there were two periods of two weeks where the coliform testing was not performed weekly as required by the Animal Welfare Act. From 18 January - 1 February 2023 and 13 June - 2 July 2023 there were no water quality results, specifically for the pinniped main pool, but appeared to be representative of all the marine mammal pools. The facility transitioned from one type of testing to another and did not maintain secondary testing capability when they were unable to get supplies to complete the required weekly testing. The facility must maintain water quality which is not detrimental to the health and well-being of the animals. Water samples must be taken and tested weekly for coliforms and records of all such test results must be made available for review by APHIS officials.

Correct by 19 December, 2023

3.154

Environment enhancement to promote psychological well-being.

The aquarium has an extensive behavioral and environmental enrichment program, but does not have a documented plan that incorporates all the required elements of the new environmental enhancement plan to promote the psychological well-being of birds. The documented plan must be approved by the veterinarian and must address social grouping, special considerations, restraint and exemptions in addition to environmental and behavioral enrichment for each group of birds with similar needs.
