2332 C R 31
Protection, KS 67127

Customer ID: **4157**
Certificate: **48-A-0366**
Site: 002
Rebecca Mosshart (PROTECTION)

Type: ROUTINE INSPECTION
Date: 01-NOV-2016

3.1(c)(1)(i)

HOUSING FACILITIES, GENERAL.

The metal gates on the outside of at least 3 enclosures of building 3 had a build-up of flaking rust. Excessive rust can prevent the required cleaning and can affect the structural strength of these gates. All surfaces must be maintained to be free of excessive rust. Correct by 29 Nov. 2016.

3.1(f)

HOUSING FACILITIES, GENERAL.

The water receptacles for two Rottweilers were spilled creating a large area of standing water and mud at or near the food receptacle, shelter and water receptacle. Standing water and mud can soil the dogs and create an environment for the spread of diseases. Housing facilities must be equipped with drainage systems that rapidly eliminate water so animals stay dry and minimize disease hazards. Correct by 5 Nov. 2016.

3.11(d)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Near the outside wash-down drains for two buildings, numerous flies were observed. These flies were on the buildings and on the ground around these areas. Flies can transmit diseases and can be a nuisance for the dogs. A better method of fly control must be established and maintained to promote the health and well-being of the dogs, and reduce contamination by the flies. Correct by 7 Nov. 2016.

This inspection and exit interview were conducted with a facility representative.

Additional Inspectors

Hallberg Gwynn, Veterinary Medical Officer
