Type: ROUTINE INSPECTION
Date: 01-JUL-2015

3.125(a)

FACILITIES, GENERAL.

The goat walk at the back of the facility, housing two goats is in disrepair. The lowest platform has metal flashing that is sticking out in the corners and there are nails sticking up from a broken piece of wood. The goat walk is 12' to 15' in height and has rails on only one side.

The indoor and outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

Repair the goat walk to prevent injury to the goats enclosed. Rails must be added to prevent the goats from falling off the goat walk and injuring themselves.

To be corrected by July 15, 2015.

Inspection and exit conducted with the licensee.
