LAURA LAPORTE

Type: ROUTINE INSPECTION
Date: 17-JUL-2024

2.1(b)(2)(i)

Requirements and application

The maximum number of animals authorized for the facility's current license is 100, but the APHIS official counted over 200 regulated animals during inspection. The USDA license authorizes a specific number of animals to ensure the facility is capable of providing care for that number of animals. A licensee must obtain a new license before any change resulting in more than the authorized number of animals on hand at any single point in time during the period of licensure. The licensee must maintain no more than the maximum number of animals that their USDA license allows. To be corrected by October 17, 2024.

This inspection and exit interview were conducted with the licensee.
