Certificate: 93-R-0121
Site: 001
EDWARDS LIFESCIENCES LLC

Type: ROUTINE INSPECTION
Date: 19-NOV-2015

3.131(d)

SANITATION.

Indoor food storage room: Several, small, insects were observed flying in the room as well as on the walls and on several bags of pelleted hay products used to feed sheep. Also, a storage container of loose alfalfa hay for sheep did not have a properly fitted lid to seal the container, and upon opening the lid inspectors observed a moth fly out of the container. Control of insects and other pests is necessary to reduce contamination and potential disease hazards, protect the sources of food, and to promote the health and well-being of the animals. An effective program of pest control must be established and maintained.

Corrected during the inspection.

Exit interview conducted with facility representatives, Dr. Alexandra Andricos, VMO and Dr. Tyler Fields, VMO.

Additional Inspectors

Andricos Alexandra, Veterinary Medical Officer
