Site: 001  
LAVERN NOLT

Type: ROUTINE INSPECTION  
Date: 22-JUL-2014

---

### 3.6(a)(2)(1)

#### PRIMARY ENCLOSURES.

There is one enclosure in the breeding stock area that has an area where the coated wire is broken. The section of damaged wire is along the bottom right of the enclosure next to the food receptacle. The pointed edge of the wire is facing inside the enclosure affecting one dog. This can create a hazardous situation for the dog. This must be repaired or replaced in a manner that eliminates the bent and broken wires and protects the dog from injury.

To be corrected by July 24, 2014.

Exit interview conducted with facility representative.
