JOHN ERIC DANKER

Type: ROUTINE INSPECTION
Date: 19-NOV-2014

3.11(c)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Housekeeping for premises.

Within the sheltered facility there is an accumulation of dust, cobwebs and rodent droppings on the surfaces of the enclosures. Trash, pieces of soiled newspapers and dirty bedding materials have accumulated on the floor. There is rodent droppings mixed in with the discarded materials on the floor adjacent to the northwest wall. Along the wooden surface between the top row and bottom row of enclosures is an accumulation of rodent droppings. The affected area is throughout the building housing 52 dogs. This indicates a living area for rodents, pests and other vermin. Unsanitary conditions exist if the affected areas are not kept clean and could lead to health issues. The licensee must ensure that all buildings and surrounding grounds are kept clean to facilitate required husbandry practices.

To be corrected by: November 23, 2014.

3.11(d)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Pest control.

Within the sheltered housing facility containing 52 dogs, there is an accumulation of rodent droppings present on the floor and the wooden surface between the top row and bottom row of the enclosures. Two mice are observed running along the bottom of the north wall into a small hole in the northwest corner. Inside the outdoor housing facility containing 54 dogs, there are two mice running along the north wall and into dirt holes. One mouse was seen climbing on the outside of an enclosure occupied by three dogs. The licensee stated he has the items needed to correct the problem and showed the inspector the materials going to be used for controlling the rodents. Failure to provide an effective program that can control rodents can create unsanitary conditions and lead to the potential spread of disease. No bait, bait traps or other means to control or eliminate the rodents were viewed during the inspection. The licensee must establish an effective program of rodent control for the health and well being of the dogs.

To be corrected by: November 23, 2014.

Exit interview conducted with licensee.
