

## Inspection Report

Caara Bergeron  
3857 Animal Land Drive S E  
Bemidji, MN 56601

Customer ID: **326631**  
Certificate: **41-C-0280**  
Site: 001  
CAARA BERGERON

Type: ROUTINE INSPECTION  
Date: 23-JUL-2014

### 2.131(d)(2)

#### HANDLING OF ANIMALS.

This facility has a primary enclosure housing forty-seven deer in which the public can walk freely about the enclosure. At the time of the inspection there was no employee or attendant present in the deer enclosure while members of the public were out among the deer. Not having an employee or attendant present while members of the public are among the deer does not ensure for the safety of the animals and the public. A readily identifiable employee must be present at all times while members of the public have access in the deer enclosure. Correct by: 24 July 2014.

### 3.75(a)

#### HOUSING FACILITIES, GENERAL.

The access opening between the indoor and outdoor areas of three primary enclosures (one housing 3 lemurs, another housing 1 baboon and the last enclosure housing 1 patas monkey and 2 lemurs) is trimmed with a metal covering where the edges are starting to lift up creating sharp edges. The edges create a physical hazard that may potentially injure the animals as they move between the indoor and outdoor portions of the enclosures. Eliminate or repair the sharp edges in the primary enclosure: Correct by: 28 July 2014

### 3.125(a)

#### FACILITIES, GENERAL.

A hole was observed under the fence line at the corner of the outer edge of the enclosure housing the bobcat. The hole creates a potential opening for the bobcat to escape it's enclosure. Eliminate the hole to ensure that the animal is contained within it's enclosure. Correct by: 24 July 2014.

The access opening between the indoor and outdoor areas of the primary enclosure (housing 2 coatimundi) is trimmed with a metal covering where the edges are starting to lift up creating sharp edges. The edges create a physical hazard that may potentially injure the animals as they move between the indoor and outdoor portions of the enclosures. Eliminate or repair the sharp edges in the primary enclosure: Correct by: 28 July 2014.

There is a leaky water hose that runs along the frame of the bear enclosure. The leaky hose has caused an area of
