

Inspection Report

Judy Raney
3069 County Road 5500
Liberty, KS 67351

Customer ID: **16158**
Certificate: **48-A-1624**
Site: 001
Judy Raney

Type: ROUTINE INSPECTION
Date: 10-SEP-2015

3.6(a)(2)(12) REPEAT

PRIMARY ENCLOSURES.

The outside wire runs of the Stacker building that are coated with a material (plastic/fiberglass/rubber, etc.) have numerous missing pieces of the material, leaving bare wire that is not adequate flooring for dogs to walk on. Metal strands of wire used for flooring must be greater than 1/8 of an inch in diameter (9 gauge) or coated. These missing pieces of coating leave the metal wire strands that dogs are walking on bare and less than 9 gauge. This flooring must be repaired or replaced in a manner that can maintain a safe environment for dogs to walk. This will help ensure that the dogs in this building are on flooring that will allow them to move around comfortable and be injury free.

This inspection and exit briefing were conducted with the facility owner and Karl Thornton, ACI
