Site: 003

The Nature of Wildworks

Type: ROUTINE INSPECTION

Date: 12-NOV-2024

3.153(a)(1)(i)

Repeat

Primary enclosures.

Sharp points were found in the enclosure containing a Blue and Gold Macaw. There was a wooden (2 by 4) perch that was broken leaving the entire metal support (joists) exposed. Another joist had pulled away from the wooden perched exposing the sharp metal edge. The macaw was free in the enclosure with access to the sharp points. The primary enclosure must be constructed and maintained so that they have no sharp points that could potentially injure the birds. Correct by: 11/18/2024

3.153(a)(1)(ix)

Primary enclosures.

The Great horned owl enclosure, the Barn Owl Enclosure, and the Ferruginous Hawk enclosure had walls with exposed damaged plywood and/or particleboard that was not able to be effectively cleaned and sanitized. Primary enclosures must be constructed and maintained so that all surfaces in contact with the birds may be readily cleaned and/or sanitized in accordance with 3.158 or be replaced when worn or soiled. Correct by: 11/23/2024

This inspection and exit interview were conducted with Facility Representative.
