Customer ID: **3307**

Certificate: **58-C-0548**

Site: 001

OCTAGON SEQUENCE OF EIGHT INC.

Type: ROUTINE INSPECTION

Date: 16-SEP-2014

3.125(a)

FACILITIES, GENERAL.

The bear enclosure which is now used as a lock out has a stepping area for the pool made of poles which have several bolts protruding outward. These bolts could cause injury if the bears during lockout climb onto the stepping poles. The licensee stated the bears are at this lock out area only during cleaning and are monitored.

There are a few metal lock out gillotine doors that are rusted at the bottom and need replaced at several lion and tiger enclosures. Although these rusted areas do not cause any threat of entering the other side or injuries at this time, they need to be replaced and kept in good repair for no future problems.

Enclosures must be constructed of such material and of such strength as appropriate for the animals involved. The outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

TO BE CORRECTED BY: SEPTEMBER 25, 2014.

Prepared By: RICHARD BOTELHO, JR, A C I USDA, APHIS, Animal Care
