Site: 001
ENOS STOLTZFUS

Type: ROUTINE INSPECTION
Date: 22-OCT-2024

2.75(b)(1) Repeat

Records: Dealers and exhibitors.

A current record of guinea pigs on hand was not available for review at time of this inspection. There were no inventory records kept since August 7, 2024. A total of 170 adult guinea pigs and 8 offspring were counted during this inspection. Failure to maintain records can make it difficult to assess the health of the caviary by identifying animal losses by decreased number of guinea pigs born and raised. Licensee must maintain records containing the required information for animals which disclose the number of guinea pigs, owned, acquired, or disposed of including births and deaths.

3.31(b)

Sanitation.

Housekeeping. There were accumulations of cobwebs, dust, dirt, hay, and bedding in empty enclosures and on and between guinea pig racks. Accumulations of cobwebs, dust, dirt, and old bedding can expose the animals to disease hazard, health problems, and poor air quality. Correct by ensuring the premises are kept clean, including: removing accumulations of cobwebs, dust, hay and bedding from empty enclosures, racks, and surfaces; routinely dusting off and sanitizing all surfaces inside the animal room; and maintaining a general cleanliness to support good animal husbandry and health. Correct by: October 26, 2024.

This inspection and exit interview were conducted with the facility representative.
