Certificate: **23-C-0225**

Site: 001

The Pennsylvania Wildlife Center

Type: ROUTINE INSPECTION

Date: 07-SEP-2023

3.127(d)

Facilities, outdoor.

The facility does not have a perimeter fence around two new small mammal enclosures. The licensee recently created an outdoor enclosure for their skunk and another outdoor enclosure for their opossum, both of which are not enclosed by a perimeter fence.

A perimeter fence is important to ensure that the regulated animals are protected from unauthorized persons and animals which may intend to have contact with them.

Licensees are required to enclose outdoor housing facilities for subpart F species with a perimeter fence, not less than 6 feet high and not less than 3 feet in distance from the primary enclosure. The fence must be constructed so that it protects the regulated animals by restricting unauthorized persons and animals and functions as a secondary containment system for the regulated animals. The fence must be of sufficient distance from the primary enclosure to prevent physical contact between animals inside the enclosure and animals or persons outside the perimeter fence.

Correct by: December 31, 2023.

This inspection and exit interview were conducted with a facility representative.
