Site: 001

VALLEY EXOTICS L L C

Type: ROUTINE INSPECTION

Date: 12-MAY-2015

### 3.125(a)

#### FACILITIES, GENERAL.

The enclosure with two adult Patagonian cavy has an area where feet could go through chain link fencing. The cavy enclosure has chain link fencing underneath the enclosure to prevent escape from digging; however, there are two holes (approximately 1 foot in diameter) underneath the enclosure in which the cavy's feet could easily pass through the chain link fencing. Feet or legs can become injured if an animal becomes entangled in the chain link fencing. Mulch was placed to fill in the hole underneath the fencing at the time of exit. The issue was corrected at time of exit.

The inspection and exit interview were conducted with the Licensee.
