DOMINOS PETTING FARM AND
EVENT CENTER

Type: ROUTINE INSPECTION

Date: 15-MAR-2023

3.125(a)

Facilities, general.

The metal shelter located in the goat pasture, housing 5 goats, was in disrepair. On the left side of the shelter, the frame had broken away from the sheet metal wall. The bar creating that portion of the frame was bent and cracked. It extended approximately 5 inches downward, reducing the amount of head space animals had to enter on that side of the shelter. Keeping shelters in good repair and maintaining structural integrity is crucial to preventing animal injury. All outdoor housing facilities must be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

To be corrected by March 22nd, 2023.

3.127(c)

Facilities, outdoor.

Three pastures housing 10 cattle, 4 alpacas, 2 llamas, and 12 sheep had excessive water. The animals had to walk through mud or standing water to reach waterers and grain troughs. Inadequate drainage with accumulation of water and mud can adversely affect hoof health when animals are standing in these conditions for prolonged periods. It also may lead to ice buildup and slippery conditions when temperatures drop below freezing. A suitable method shall be provided to

Inspection Report

rapidly eliminate excess water.

A corrective action plan to help mitigate further drainage issues in the area should be established by April 15th, 2023.

This inspection and exit interview were conducted with facility representatives.
