PARK, L L C

Type: ROUTINE INSPECTION

Date: 13-MAR-2023

---

### 3.127(d)

#### Facilities, outdoor.

Portions of the perimeter fence are now less than 8 feet high due to soil erosion. A point along the western section measured 7 feet 4 inches in height and a point along the northern section measured 7 feet 6 inches in height. A perimeter fence of less than 8 feet high may not adequately protect the animals inside the facility or be an efficient secondary containment system. Perimeter fencing for potentially dangerous animals must be of sufficient height to protect the animals within the facility from entry of outside animals and unauthorized persons as well as function as a secondary containment system for the animals in the facility.

Correct by 30 June 2023.

### 3.133                      Critical Separation.

On 13 September 2022, staff discovered that a wildebeest named Keva was found deceased and entangled in fencing in one of the hoofstock enclosures. Staff had noted incompatibility signs consistent with natural behavior between the yearling wildebeest and the rest of the herd within a week prior to death. The licensee must ensure compatibility among animals housed in the same primary enclosure or separate incompatible animals, even when displaying natural or
