Repeat

Requirements and application

The licensee is conducting regulated activity at unapproved sites. The licensee stated that she has 2 breeding pairs of marmoset and 1 breeding pair of ring-tailed lemurs at her property in Florida. These animals are paired up for breeding, and the lemurs recently had an infant. The licensee also owns 2 infant caracal cats that are currently housed at a property in Alabama. The properties in Florida and Alabama have not been inspected and approved for regulated activity by USDA officials. The licensee has repeatedly been informed by USDA officials that no regulated activity may occur at unapproved locations. Inspection and approval of locations (sites) where animals are housed is essential for ensuring animal welfare and compliance with the Animal Welfare Act (AWA) regulations. Correct by only conducting regulated activity (including breeding, selling, and exhibiting AWA-covered animals) at sites/locations that have been inspected and approved by USDA officials.

This inspection and exit interview were conducted with the licensee.
