Certificate: **74-C-0728**
Site: 001
MEGAN GUARDIOLA

Type: ROUTINE INSPECTION
Date: 04-AUG-2015

3.125(a)

FACILITIES, GENERAL.

An old trailer was being used as the fence on one side of the yak enclosure. This trailer had old tin sheets running along the bottom with sharp points exposed to the animals. An animal could be severely injured by the sharp tin. This trailer needs to be repaired or removed.

To be corrected by Jan 1, 2016

3.127(c)

FACILITIES, OUTDOOR.

There was a large water puddle outside of the llama enclosure. This puddle appeared to be the result of a leaking automatic water bowl inside the llama enclosure. Stagnant water puddles are breeding grounds for mosquitos and other disease causing organisms. The automatic water bowl needs to be repaired and areas of large standing water prevented in the future.

To be corrected immediately.

Inspection and exit interview conducted with the licensee.
