Site: 001
LAVERN NOLT

Type: RE-LICENSE INSPECTION
Date: 23-SEP-2021

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

A bottle of pills labeled "Metronidazole 500 mg" has no instructions or expiration date. The licensee says they received the medications from their attending veterinarian and use it routinely for treatment of parasites in puppies. The licensee does have a list of medication dosages approved by the attending veterinarian that does include metronidazole. The appropriate use medications and assurance that those medications are safe and effective are important for proper treatment and control of diseases. All medications must be properly labeled, including expiration dates, and instructions for use written on the container or included in a written program of veterinary care signed by the attending veterinarian.

3.1(e)

Housing facilities, general.

The container holding wood shaving bedding for the dogs did not have a lid on it. All open supplies of food and bedding must be kept in leakproof containers with tightly fitting lids to prevent contamination and spoilage. The facility must put the open bedding material in a container with a tight fitting lid.

3.1(f)

Housing facilities, general.

The trash container in the dog building did not have a lid on it. Open trash can attract insects and other pests that can be a threat to the health and well being of the dogs. Trash containers in housing facilities must be leakproof and must have

Inspection Report

tightly fitted lids on them at all times. The facility must use a trash container with a tight fitting lid in the this area where the dogs are housed.

3.13(a)(3)

Veterinary care for dogs.

The written program of veterinary care is incomplete. There is no plan for sampling for blood and intestinal parasites.

There is also no treatment plan for blood parasites. Parasites are a common cause of disease in dogs and puppies and if undetected and properly treated, can lead to serious illness and even death. The program of veterinary care must be completed and include plans for sampling and treatment for blood and intestinal parasites.

3.13(a)(4)

Veterinary care for dogs.

The written program of veterinary care does not include any plans for preventative care and treatment to ensure healthy and unmatted hair coats, properly trimmed nails, and clean and healthy eyes, ears, skin, and teeth. A plan for the care and appropriate treatment of disease in these areas is important for the health and well being of the dogs. The program of veterinary care must be completed to include preventative care and treatment to ensure healthy and unmatted hair coats, properly trimmed nails, and clean and healthy eyes, ears, skin, and teeth.

This is a 1st Re-License Inspection for a Class "A" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by November 22, 2021 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
