Site: 001
JIMMY D MOORE

Type: FOCUSED INSPECTION
Date: 03-AUG-2023

3.127(b) Critical

Facilities, outdoor.

***During the ice storm of January 31, 2023-February 2, 2023, it was reported to the inspector that two juvenile Blackbuck had died during the storm. Natural shelter of trees, brush piles and at least two artificial structures were available for shelter.

Lack of shelter for all animals during weather extremes can cause discomfort, illness or death.

The licensee must ensure that enough shelter is provided for protection of all of the animals and that all animals are acclimated prior to exposure to weather extremes.

To be corrected from August 3, 2023 forward.

This inspection and exit interview were conducted with the facility representative.
