Type: ROUTINE INSPECTION
Date: 13-SEP-2024

3.125(a)

Repeat

Facilities, general.

On August 1, 2024 a male zebra was scheduled to be shipped from the facility and was moved from its enclosure to a stall in the horse barn. At some point thereafter the zebra escaped from the stall and traveled to the adjacent neighbors yard. The animal then returned back to the facility unharmed. The facility must ensure that all enclosures, permanent or temporary, must securely contain the animals to protect them from potential injury.

3.131(a)

Sanitation.

The shelf inside of the coatimundi enclosure was found with a build up of debris consisting of a dark material and old food waste. This could harbor disease causing agents and negatively affect the health of the animal. Animal enclosures must be cleaned as frequently as necessary in order to minimize disease hazards and ensure the health of the animals. The facility corrected this issue at the time of inspection.

*****Corrected on 9/13/24

This inspection and exit interview were conducted with the facility representative.
