

Inspection Report

Virginia Safari Park Inc
Po Box 147
Natural Bridge, VA 24578

Customer ID: 2481
Certificate: 52-C-0166
Site: 003
GULF BREEZE ZOO

Type: ROUTINE INSPECTION
Date: 16-DEC-2015

3.75(c)(3)

HOUSING FACILITIES, GENERAL.

** In the second group of squirrel monkey's enclosure there was feces on the branch that is propped up on the night house to the left of the door entering their building. There was also some feces on the side of the night house where the branch was propped against. Hard surfaces with which nonhuman primates come in contact must be spot-cleaned daily and sanitized to prevent accumulation of excreta or disease hazards for the well being of the animals. Correct by December 19, 2015.

3.125(a)

FACILITIES, GENERAL.

** In the llama's enclosure there was a long crack in the concrete. That crack had a rectangular 4 in wide sized hole in the middle that a llama could get their foot caught in when going to the water trough. To protect the animals from injury within their enclosure this hole needs to be filled and/or repaired. Corrected by the exit interview.

3.131(c)

SANITATION.

** In the commissary where the produce is prepared for the animals there was mud across the floor. The traffic from the employees retrieving their produce probably contributed to the excessive mud. There was no place to dry your feet and they had not mopped to minimize the mud. This area should be kept clean to keep the environment sanitary for the preparation of food for the animals. Correct by December 19, 2015

The Director refused to sign the inspection report as instructed by their Corporate office. The report was left with the Director.

The inspection and exit interview were conducted with the Director and Attending Veterinaria

Prepared By: ANNETTE CHAPMAN, D V M USDA, APHIS, Animal Care
