### 3.125(a)

#### FACILITIES, GENERAL.

The trees in the tiger enclosure have grown to the point that they could potentially provide a way for the tiger to escape. Particularly when a large carnivore is involved, it is important to maintain enclosures in a highly secure manner. Steps must be taken to secure the enclosure, either by trimming the trees or providing a cover for the enclosure. Complete by 11 November 2014.

An exit interview was conducted with the licensee.
