2.134(b)

Contingency planning.

Annual review of the contingency plan was not documented within the last year. Annual review ensures that any necessary updates or adjustments to the plan are made for animal welfare, and documentation of the annual review ensures accountability. The facility must ensure that the plan is reviewed and the review documented annually.

Correct by February 28, 2025

3.75(c)(1)(i)

Housing facilities, general.

Two metal sided enclosures housing Patas and red tailed monkeys had several rusted sections (varying in length from 6-12 inches) that were flaking and pitted, and could not be adequately sanitized. Flaking, rusted surfaces may harbor bacteria or mold, and may become a source of contamination or have an adverse effect on animal welfare if ingested or picked at. The facility must ensure that surfaces of housing facilities are free of excessive rust that may affect structural integrity and prevent adequate cleaning and sanitation.

Correct by February 19, 2025.

This inspection and exit interview were conducted with the facility representative.
