Type: ROUTINE INSPECTION
Date: 25-JUL-2017

2.40(a)(1)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

-- The Program of Veterinary Care (PVC) is out of date. The last recorded site visit by the attending veterinarian was on 8/24/15. Good communication and consultation between the licensee and the attending veterinarian in the form of a written program of veterinary care and regularly scheduled visits to the premise are necessary for the health of the animals. The licensee must schedule a site visit with the attending veterinarian as soon as possible. The program of veterinary care must be updated to reflect the current preventive practices for all animals at the facility to ensure that they are provided with adequate veterinary care at all times.

To be corrected by: 8/2/17.

2.40(b)(2) DIRECT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

-- In the back of the facility, there was a brown and white, long-haired, female guinea pig with an open wound and lesions on her left hip. The wound approximately two inches in diameter was circular in shape, reddened, moist with fresh blood and was hairless. Additional, older, scabby lesions outlined the edge of the fresh wound. The licensee stated that this was the first time the wound had been noticed. At the time of inspection, the attending veterinarian had not been consulted and no treatment had been administered. An open wound can be painful causing discomfort and could lead to the spread of infection which affects the health and well-being of the guinea pig. The licensee must have this animal examined by a licensed veterinarian in order to ensure that an accurate diagnosis and treatment of the wound is provided. Any medical records must be made available to the inspector upon request. The licensee was given verbal instruction to have this animal examined by the end of business 7/26/17. The outcome of this examination must be documented and provided to the inspector upon request. The licensee must ensure that all animals receive adequate veterinary care at all times.

To be corrected by: 7/26/17.

This inspection and exit interview were conducted with the facility representative.
