ANIMAL-GRAMS & JOJU ANIMAL
ENTERTAINMENT

Type: ROUTINE INSPECTION

Date: 07-JAN-2025

2.75(a)(1)(i)

Records: Dealers and exhibitors.

At the time of inspection, the licensee did not have records that fully disclose required information regarding domestic cats purchased, sold, held, or otherwise acquired. Domestic cats were being housed loose, overnight, in the same indoor facility with loose chickens, caged guinea pigs, and caged rabbits. Though the domestic cats were not to be used for exhibition, they were being housed in the same indoor facility as regulated animals. Appropriate documentation of acquired regulated animals is essential for proper identification and necessary to track animals used in regulated activities to ensure their humane care, use, and disposition.

Domestic dogs and cats must be housed separated from regulated animals. Otherwise, the licensee must make, keep, and maintain records or forms which fully and correctly disclose required information concerning each dog or cat purchased, owned, held, or otherwise acquired. The records shall also include any offspring born of any animal while in the licensee's possession or under the licensee's control.

To be corrected from this day (1/8/2025) forward.

2.134(a)

Contingency planning.

At the time of inspection, the licensee did not have a Contingency Plan. A contingency plan is essential to ensuring the health and well-being of animals, in the event of an unanticipated emergency or disaster.

The licensee must develop, document, and follow an appropriate plan to provide for the humane handling, treatment, transportation, housing, and care of their animals in the event of an emergency or disaster (one which could reasonably be anticipated and expected to be detrimental to the good health and well-being of the animals in their possession).

To be corrected by 2/28/2025.

Inspection Report

Facilities, indoor.

At the time of the inspection the indoor housing facility holding 9 guinea pigs was at a temperature of 52 degrees Fahrenheit, as measured by a kestrel. Guinea pigs kept in ambient temperatures that are too low may be subject to cold stress that may cause discomfort and predispose them to developing other health issues.

Indoor housing facilities for guinea pigs shall be sufficiently heated to protect the animals from the cold, and to provide for their health and well-being. The ambient temperature in indoor housing facilities for guinea pigs must not fall below 60 degrees Fahrenheit.

To be correct by 1/10/2025.

This inspection and exit interview were conducted with the licensee.
