Site: 001

JAN AND ROGER CAVANAUGH

Type: ROUTINE INSPECTION

Date: 30-AUG-2023

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

A black and white striped hen was observed to be limping on her left leg. The leg appears to be swollen and to be rotated with the toes pointing outward. The abnormal appearance of the leg indicates that there was possibly a previous injury or infection and no veterinary care has been provided to evaluate the bird's leg. Untreated injuries or infections can be painful and affect the well-being of the animal. The chicken must be evaluated by the Attending Veterinarian and any prescribed treatments must be followed. Correct by September 15, 2023.

3.154

Environment enhancement to promote psychological well-being.

The licensee has not developed and documented an environmental enhancement plan to promote the psychological well-being of the birds housed at the facility. Lack of an environmental enhancement plan does not ensure that adequate and appropriate measures to promote the psychological well-being of the birds are being provided. The licensee must develop, document and follow an environmental enhancement plan that promotes the psychological well-being of the birds. The plan must also be approved by the Attending Veterinarian. Correct by: September 30, 2023.

This inspection and exit interview were conducted with the Licensee.
