3.11(a)

Cleaning, sanitization, housekeeping, and pest control.

The outdoor sections of the enclosures are not being adequately cleaned. The groundlevel areas are packed over with soiled snow, and the elevated platforms are covered with frozen urine and feces. Soiled areas do not allow the dogs to use the full space without becoming contaminated with urine and feces, as well as presenting a risk for disease transmission. Correct by ensuring excreta is removed from primary enclosures daily.
